*ISSUE № 32
VOLUME II*

MOSCOW
– 2013 –

The current issue comprises information on EARAZA member zoos and other zoological institutions. The first part of the publication includes collection inventories and data on breeding in all zoological collections.

The second part of the issue contains information on the meetings, workshops, trips and conferences which were held both in our country and abroad, as well as reports on the EARAZA activities.

Dear Colleagues,

We offer to your attention the 32st volume of the Informational Materials on the Eurasian Regional Association of Zoos and Aquariums, which includes two volumes. This publication has been prepared by the EARAZA Zoo Informational Center (ZIC) based on the results of the analysis of the data provided by zoological institutions of the region.

The volume contains data on 109 collections of regional zoos, and also a section dedicated to significant zoo events, news, and activities that took place at the zoos, aquariums, exotariums, breeding stations, and other zoological organizations.

To make the publication urgent and useful, the member zoos are requested to keep to the deadline for the submission of the materials to the EARAZA ZIC.

The information on your zoological institution, taxonomic inventories of the collections, including scientific names and according to the taxonomy recognized by our issues and data on breeding of animals as of the 1st of January of the current year should be sent before 1 of February. ***Please note that the data from the institutions that have not submitted the required information by the deadline will not be included in the next volume.***

Also, please try to observe the deadline when sending the logotypes and guidebooks of your zoos for the general information section, as well as the notes on the zoo news and articles about education and methodical activities.

Please be aware that the proposals for the Appendices "Surplus and wanted list of animals" should be sent to the EARAZA ZIC twice a year, with the data being shown as of January 1, and July 1 of a current year.

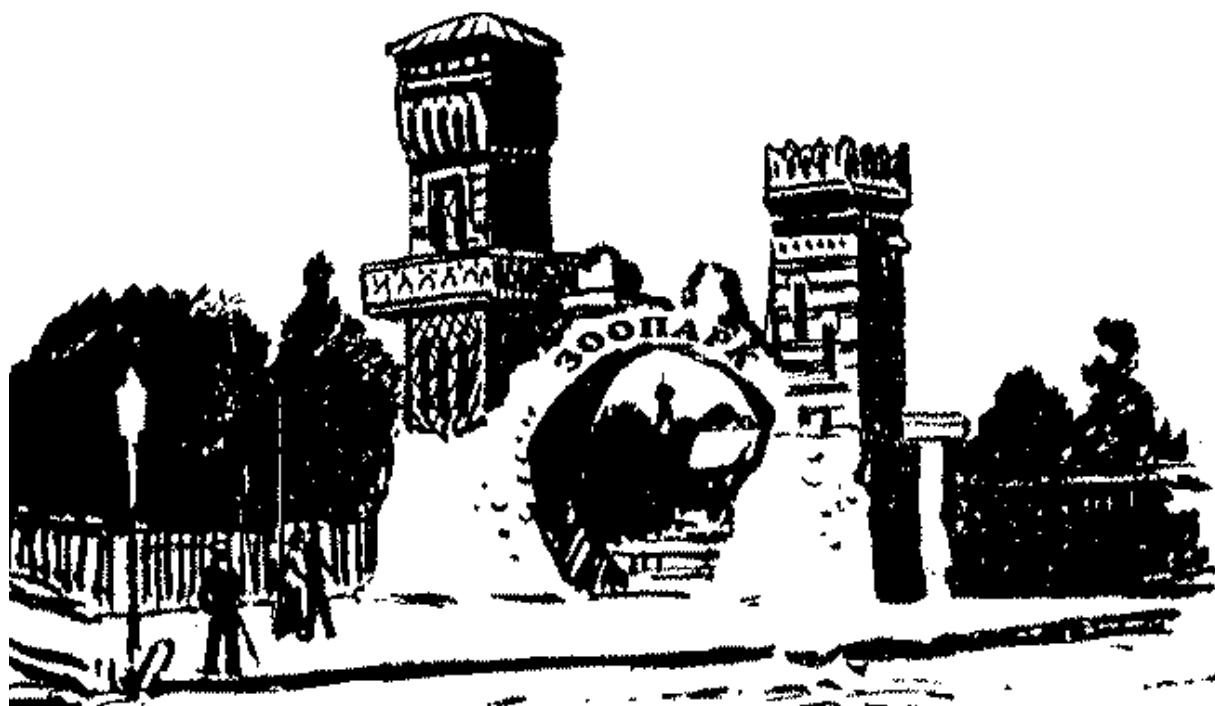

We pay your attention that greater changes have occurred in categories of the Red Book (IUCN) (see the appendix № 1).

We hope, that in time the given data and duty release of the "Informational Issue" and the Appendix to it, is corresponded to your professional interests, and our fruitful cooperation will be continued in the further.

Our readers can find the contents of this publication on the website of the EARAZA: www.earaza.ru.

Vladimir V. Spitsin

Chairman of the Eurasian Regional Association of Zoos and Aquariums (EARAZA)
General Director of the Moscow Zoo,
Member of the Russian Academy of Natural Sciences
